is pleased to announce

NEW YORK STATE TRAINING INSTITUTE WEBINARS

Registration deadline: Friday, March 19th !!

“Homeless Youth...Here? I don't think so”

“How Do I Know When the Community I'm Working In Is Ready to Listen?”

Community Readiness Model

The Community Readiness Model is an innovative, science-based method for assessing the level of readiness of a community to develop and implement prevention/intervention programming. Scientifically developed as a cross-breed of three behavior models (The Readiness for Behavior Change, Decision-Making Process and New Ideas, and The Social Action Process), it can be used as both a research tool to assess distribution levels of readiness across a group of communities or as a tool to guide prevention/intervention efforts at the individual community level.

Participants will be able to:

- Identify specific characteristics related to different levels of problem awareness and readiness for change;
- Develop the skill of using this tool to measure their community's level of readiness for change;
- Understand how to create the consistency with awareness of the issue and the level of readiness for change present among residents of their community;
